Exam : **2V0-72.22**

Title : Professional Develop VMware Spring

Version : DEMO

1.Which two statements are true regarding Spring Boot Testing? (Choose two.)

A. @TestApplicationContext is used to define additional beans or customizations for a test.

B. Test methods in a @SpringBootTest class are transactional by default.

C. @SpringBootTest is typically used for integration testing.

D. Test methods annotated with @SpringBootTest will recreate the ApplicationContext.

E. @SpringBootTest without any configuration classes expects there is only one class annotated with@SpringBootConfiguration in the application.

Answer: C,D

2.Which two use cases can be addressed by the method level security annotation @PreAuthorize? (Choose two.)

A. Allow access to a method based on user identity.

B. Allow access to a method based on the returned object.

C. Allow access to a method based on HTTP method.

D. Allow access to a method based on request URL.

E. Allow access to a method based on roles.

Answer: C,E

Explanation:

Reference: https://docs.spring.io/spring-security/site/docs/5.2.11.RELEASE/reference/html/authorization.html

3.Which two statements are true regarding a Spring Boot-based Spring MVC application? (Choose two.)

A. The default embedded servlet container can be replaced with Undertow.

B. Jetty is the default servlet container.

C. Spring Boot starts up an embedded servlet container by default.

D. The default port of the embedded servlet container is 8088.

E. Spring MVC starts up an in-memory database by default.

Answer: B,C

Explanation:

Reference: https://www.javatpoint.com/spring-vs-spring-boot-vs-spring-mvc

4.What are the two reasons Spring be used to build a Java application? (Choose two.)

A. Spring automates a Java application build.

B. Spring provides a Dependency Injection container.

C. Spring automates deployment of Java applications to all of the major cloud providers.

D. Spring provides comprehensive Java IDE support.

E. Spring provides abstractions over infrastructure such as persistence and messaging.

Answer: A,B

Explanation:

Reference: https://spring.io/why-spring

5.Which two statements are correct regarding the @EnableAutoConfiguration annotation? (Choose two.)

A. It is a meta-annotation on the @SpringBootApplication composed annotation.

B. It enables auto-configuration of the ApplicationContext by attempting to guess necessary beans.

C. It is meta-annotation on the @SpringBootConfiguration composed annotation.

D. It has the same effect regardless of the package of the class that is annotated with it.

E. It ensures auto-configuration is applied before user-defined beans have been registered.

Answer: A,D

Explanation:

Reference: https://docs.spring.io/spring-
boot/docs/current/api/org/springframework/boot/autoconfigure/EnableAutoConfiguration.html
