Exam   :   **300-515**

Title   :   Implementing Cisco Service
                  Provider VPN Services
                  (SVPI)

Version   :   DEMO

1.Which two statements describe primary differences between MPLS Layer 2 and Layer 3 VPNs? (Choose two.)

A. Layer 2 VPNs use IPsec tunneling, but Layer 3 VPNs use L2TPv3 tunneling.

B. Layer 2 VPNs use AToM, but Layer 3 VPNs use MPLS/BGP.

C. Layer 2 VPNs use BGP, but Layer 3 VPNs use VPLS.

D. Layer 2 VPNs use L2TPv3 tunneling, but Layer 3 VPNs use GRE tunneling.

E. Layer 2 VPNs use IPsec tunneling, but Layer 3 VPNs use pseudo wires to provide tunneling.

Answer: B,D

2.Refer to the exhibit.

```
PE1                                        CE1
ip vrf ce1vpn                              interface FastEthernet0/0/0
  rd 111:1                                     ip address 192.168.0.2 255.255.255.0
  route-target export 111:1
  route-target import 222:2                interface FastEthernet0/0/1
                                               ip address 192.168.1.2
interface FastEthernet0/0/0               255.255.255.252
  ip vrf forwarding ce1vpn
  ip address 192.168.0.1 255.255.255.0    router ospf 100
                                              network 192.168.0.0 0.0.0.255 area1

router ospf 1 vrf ce1vpn                  router bgp 65600
  network 192.168.0.0 0.0.0.255 area 1       neighbor 192.168.1.1 remote-as 65600
```

If the two devices are operating normally, which two conclusions can you draw from this configuration? (Choose two.)

A. CE1 must use OSPF to establish a neighbor relationship with PE1.

B. PE1 labels the routes it learns from CE1 with the route-target 222:2 and shares them with its VPNv4 peers.

C. PE1 labels the routes it learns from CE1 with the route-target 111:1 and shares them with its VPNv4 peers.

D. The PE-CE routes between the devices are being exchanged by OSPF

E. CE1 is supporting CSC.

Answer: A,D

3.Which two frames can be configured on an Ethernet flow point? (Choose two.)

A. of a specific VLAN

B. with different type of service values

C. with identical type of service value

D. with different class of service values

E. with no tags

Answer: A,E

Explanation:

4.An engineer is investigating an EVPN traffic flow issue.

Which type of traffic should the engineer allow in an EVPN Tree Service in order to fix this issue?

A. known unicast from a leaf to another leaf

B. unknown unicast from a leaf to another leaf

C. multicast from a leaf to another leaf

D. known unicast from a root to another root

Answer: D

Explanation:

5.An engineer is investigating an MPLS LDP issue.

Which command should an engineer use on a Cisco IOS XE device to display the contents of the LFIB?

A. show mpls forwarding-table

B. show mpls ldp neighbors

C. show mpls ldp labels

D. show mpls ldp bindings

Answer: A

Explanation:
