Exam : **ACD100**

Title : Appian Certified Associate Developer

Version : DEMO

1.Every business process, whether inside or outside of Appian, requires which of the following?

A. Human interaction

B. Defined steps

C. Reporting

D. Automation

Answer: B

2.A client requested a feature that is exceptionally specific and uncommon.

You begin by gathering research to help determine how such a feature could be implemented, but no documentation is available.

What should you do next?

A. Create a Support Case.

B. Check The Appian Academy.

C. Review the Appian Playbook.

D. Ask the Appian Community.

Answer: A

3.At what stage are you most likely to regularly refine the backlog?

A. Optimize

B. Release

C. Build

D. Initiate

Answer: C

Explanation:

Step 2: Refine Backlog During each iteration, the team will hold refinement sessions to further detail the requirements in the remaining backlog. The Team Lead ensures this meeting takes place to make sure the backlog contains the target of "2 Sprints worth of User Stories in the backlog" at the start of the upcoming new Sprint.

4.HOTSPOT

Match each sprint ceremony to its appropriate objective. Each objective may be used once, more than once, or not at all.

Sprint Retrospective

Select a match

> The ceremony is designed for the Product Owner and Development Team to meet and review the prioritized Product Backlog.
> The Development Team showcases all of the work that has been completed during the sprint, allowing stakeholders to see the application and adapt the product going forward.
> This ceremony provides the team with a platform to discuss what is going well, what could go better, and some suggestions for changes going forward.
> The Development Team estimates the difficulty of developing a feature by using an abstract, but agreed upon, measurement of effort required to implement it.

Story Pointing

Select a match

> The ceremony is designed for the Product Owner and Development Team to meet and review the prioritized Product Backlog.
> The Development Team showcases all of the work that has been completed during the sprint, allowing stakeholders to see the application and adapt the product going forward.
> This ceremony provides the team with a platform to discuss what is going well, what could go better, and some suggestions for changes going forward.
> The Development Team estimates the difficulty of developing a feature by using an abstract, but agreed upon, measurement of effort required to implement it.
