Exam : HP0-M23

**Title : HP Business Availability
Center Foundation**

Version : DEMO

1. What is the main function of the Report Repository?

- A.store reports imported from other applications
- B.store reports saved by users at a specific state
- C.store reports saved by users with dynamic state
- D.store reports specific to the Dashboard component of BAC

ANSWER: B

2. How would you check the start-up status of BAC using the HP BAC Server Status?

- A.in the web browser navigate to <http://:8180/BACServerStatus.asp>
- B.in the web browser navigate to <http://:8180/BACServerStatus.asp>
- C.on the gateway and the Data Processing server click on Start > Programs > HP BAC > Administration > HP BAC Server Status
- D.on the gateway and the Data Processing server navigate to \bin and activate the HPBacServerStatus.exe program

ANSWER: C

3. Which alert type can be configured to alert on a specific page, or screen, of a monitored application?

- A.SLA alert
- B.Paging alert
- C.SiteScope alert
- D.Event based alert

ANSWER: D

4. What is the purpose of the session analyzer report?

- A.to correlate between sessions, session groups and session users
- B.to display user session data for applications configured for real user monitoring
- C.to show the history of all closed sessions which were opened against the application configured
- D.to display the status of the users that are currently using the application which is being monitored

ANSWER: B

5. Which log files are used for troubleshooting SiteScope?

- A.Alert, Error and Topaz_all.ejb
- B.Run Monitor, HP BAC and Operator
- C.Run Monitor, SiteScope_all and Operator
- D.Topaz_all.ejb, NannyStatus and Jboss_boot

ANSWER: B

6. How would you create a relationship between a CI and a Business Process Monitor when defining a profile?

- A.Use the instance view editor automatic CI attachment process.
- B.Use the Monitor Deployment Wizard to automatically assign a monitor to a specific CI.
- C.Create a profile and use the attach CI option in the EUM Administration profile creation operation.
- D.Create a profile and run it, make sure the adapters are synced and then edit a view and attach the monitor from within the view

ANSWER: C

7. What is the meaning of the origin attribute that exists in each CI?

- A.the BAC user that created the CI
- B.the view in which the CI was created
- C.the package from which the CIT was deployed
- D.the data source or user that added the CI to the CMDB

ANSWER: D

8. Business Availability Center is powered by a set of servers that are responsible for facilitating system management, data handling, reporting, and alerting. Which servers are included within the Business Availability Center basic framework? (Select two.)

- A.Print Server
- B.Data Server
- C.Gateway Server
- D.Discovery Server
- E.Application Server
- F.Data Processing Server

ANSWER: CF

9. How are BPM monitoring locations determined? (Select two.)

- A.by distant locations
- B.by random selection
- C.by high user populations
- D.by lowest cost to implement
- E.by high return on investment

ANSWER: CE

10. In a typical organization, who manages the troubleshooting of IT infrastructure?

- A.BAC Administrator
- B.IT Service Manager
- C.Application Manager
- D.Operations Engineer

ANSWER: D

11. What is the purpose of the Downloads page?

- A.a location from which you can download BAC components
- B.a location to which you can download tools for use with BAC
- C.links to locations from which you can download BAC add-on monitors
- D.a location within the BAC directory structure where you can store downloaded software

ANSWER: A

12. What does the data collector maintenance page in the Business Availability Center platform enable you to do?

- A.remotely install Sitescope instances on specific servers.
- B.manage and maintain Sitescope, Business Process Monitor, and RUM
- C.remotely install, manage and troubleshoot the operation of the Discovery Probe
- D.manage and install Business Process Monitor and Real User Monitor probe instances on specific servers

ANSWER: B

13. How can you navigate to the web interface of a data collector (for example, BPM, Sitescope or RUM Engine) without knowing its explicit name or IP address?

- A.Write a query on the UCMDB to locate the data collector name and IP address in order to access it.
- B.Navigate to "Admin>Platform>Data Collection>Data Collector Maintenance" and select the appropriate tab.
- C.Navigate to "Admin>End User Management Administration>Monitor" and locate the BPM you have just installed.
- D.Navigate to "Admin>Universal CMDB Administration>Source Manager" and edit the data collector adapter to list all appropriate data collectors.

ANSWER: B

14. What is the role of the built-in BAC System Health?

- A.display in a dashboard view the status of all BAC components
- B.measure BAC performance and display BAC resources consumption and usage
- C.display in a graphical form all the components of BAC and the relationship between them
- D.detect problems with data collectors, BAC database, and the servers on which BAC runs

ANSWER: B

15. What types of System Health are available?

- A.only the BAC built-in System Health is available
- B.Operations Center System Health and BAC built-in System Health
- C.BAC built-in System Health and enhanced System Health based on Sitescope
- D.BAC built-in System Health and enhanced System Health based on Real User Monitor

ANSWER: C

16. What is the purpose of Infrastructure Settings?

- A.to configure the hardware settings of the BAC servers
- B.to configure the look and feel of the BAC graphical user interface
- C.to define the various settings which determine how BAC and its applications run
- D.to configure the binding between BAC and the network interfaces on the BAC servers

ANSWER: C

17. What is a context in Infrastructure Settings?

- A.the source application that triggers a set of alarms
- B.a group of foundations to which the same settings can be applied
- C.a group of applications to which the same settings can be applied
- D.an aid to separate all BAC configurable items into applications and foundations

ANSWER: D

18. How do you navigate the user interface to enter a license in BAC?

- A.Navigate to Admin>My BAC>License Management and enter a new license.
- B.Accept the basic, built-in factory license as part of the installation phase of BAC.
- C.Navigate to Help>About HP Business Availability Center>Registration and enter a new license.
- D.Navigate to Admin>Platform Administration>Setup and Maintenance>License Management and enter a new license.

ANSWER: D

19. Which report types are available in the End User Management application?

- A.Summary, Alerts, System Availability
- B.User Defined, Business Process, Real User
- C.Alerts, Network & Tools, Service Level, Business Process
- D.Summary, Business Process, Real User, Status Snapshot

ANSWER: D

20. What information does the Status Snapshot Report provide?

- A.worst transaction response time, worst availability by location
- B.worst transaction response time, worst availability by location
- C.worst availability by transaction, worst availability by location, worst availability by application, slowest applications
- D.worst response time by transaction, worst response time by location, worst response time by application, slowest applications

ANSWER: C
