Exam : **HP0-S33**

Title : Advanced Integration and Management of HP Server Solutions

Version : Demo

1.Which must be installed on the target server P2P migration?

A. HP Insight Dynamics ProLiant

B. HP Insight Control

C. HP iLO Advanced for BladeSystem

D. HP Insight Control server deployment

Answer: B

2 .Referring to the exhibit.

Which Smart Carrier innovation was introduced with the HP ProLiant server platform to help
reduce/eliminate downtime as a result of the wrong hard drive being removed after a failure?

A. When a drive fails, the backlight flashes blue to auto locate. The drive status goes to amber.

B. When a drive fails, it turns amber. The remaining healthy drives are held in place with an automatic
latch mechanism to present removal.

C. When a drive fails, it is disabled and powered off. The remaining healthy drives illuminate the Do not
LED.

D. When a drive fails, it turns amber. The remaining healthy drives illuminate the Do Not remove LED.

Answer: D

3.You instated Hyper-V on a BL460 G6.

Which RBSU advanced setting should be changed?

A. Hyperthreading

B. Intel Virtualization technology

C. hardware pre-fetcher

D. option ROM loading sequence

Answer: C

4.Which HP web-based tool can be used to configure a solution of servers, storage and networking along
with services, allowing an export of the final solution?

A. Sizing Tool for VMware vSphere

B. Simplified Configuration Environment

C. Sizer for Microsoft Hyper-V R2

D. Enterprise Configurator Workbench

Answer: B

5.A customer needs a direct attached based storage for a BladeSystem and wants a solution that enables low cost zoned or shared storage.
Which type of HP external storage meets the customer requirements?
A. Direct Connect SAS storage
B. Infiniband
C. Fibre Channel over Ethernet
D. Serial Attached SCSi
Answer: A

6.Which HP tool assists in estimating power consumption selection, including power supplies, at a system, rack, and multi-rack levels?
A. UPS Sizing Tool
B. Insight Control Manager
C. Power Advisor
D. Power Protector
Answer: C

7.A customer chose HP ProLiant for a VMware project that involves providing high availability for old and non-cluster aware application. The customer asks how to best protect against physical hardware failure in the VMware environment.
Which HP component provides the ability to v-Motion VMs to another physical server if a hardware-based pre-failure event occurs?
A. Insight Foundation with vSphere integration
B. Insight Control Virtualization Management
C. OpenView Operations 5 for VMware
D. Indight Control for VMware
Answer: B

8.HOTSPOT
Match each server environment to correct description.

Front-end server

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

Dynamic Host Configuration Protocol Server

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

Gateway server

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

Domain Name Services

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

File Transfer Protocol

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

Remote access server

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

Bridgehead

```
Filters and transfers network traffic
Provides resolution from hostnames to IP addresses
Assign IP addresses to clients on a network or domain
Enable downloading and uploading of files
Receives requests from clients and relays to the appropriate server
Provides access to remote networks
Connects dissimilar networks providing access
```

Answer:

Answer:

Front-end server

> Filters and transfers network traffic
> Provides resolution from hostnames to IP addresses
> Assign IP addresses to clients on a network or domain
> Enable downloading and uploading of files
> **Receives requests from clients and relays to the appropriate server**
> Provides access to remote networks
> Connects dissimilar networks providing access

Dynamic Host Configuration Protocol Server

> Filters and transfers network traffic
> Provides resolution from hostnames to IP addresses
> **Assign IP addresses to clients on a network or domain**
> Enable downloading and uploading of files
> Receives requests from clients and relays to the appropriate server
> Provides access to remote networks
> Connects dissimilar networks providing access

Gateway server

> **Filters and transfers network traffic**
> Provides resolution from hostnames to IP addresses
> Assign IP addresses to clients on a network or domain
> Enable downloading and uploading of files
> Receives requests from clients and relays to the appropriate server
> Provides access to remote networks
> Connects dissimilar networks providing access

Domain Name Services

> Filters and transfers network traffic
> **Provides resolution from hostnames to IP addresses**
> Assign IP addresses to clients on a network or domain
> Enable downloading and uploading of files
> Receives requests from clients and relays to the appropriate server
> Provides access to remote networks
> Connects dissimilar networks providing access

File Transfer Protocol

> Filters and transfers network traffic
> Provides resolution from hostnames to IP addresses
> Assign IP addresses to clients on a network or domain
> **Enable downloading and uploading of files**
> Receives requests from clients and relays to the appropriate server
> Provides access to remote networks
> Connects dissimilar networks providing access

Remote access server

> Filters and transfers network traffic
> Provides resolution from hostnames to IP addresses
> Assign IP addresses to clients on a network or domain
> Enable downloading and uploading of files
> Receives requests from clients and relays to the appropriate server
> **Provides access to remote networks**
> Connects dissimilar networks providing access

Bridgehead

> Filters and transfers network traffic
> Provides resolution from hostnames to IP addresses
> Assign IP addresses to clients on a network or domain
> Enable downloading and uploading of files
> Receives requests from clients and relays to the appropriate server
> Provides access to remote networks
> **Connects dissimilar networks providing access**

9.An external storage device is connected to HP ProLiant Gen8 servers VMware 5.0i. You want to create a shared datastore for all the servers.

After creating a LUN on a storage device, what is the correct procedure to do this?

A. Present the LUN to one ESXi server, using the storage configuration tool, create a VMFS datastore and enable Round Robin or MRU policy for that datastore.

B. Present the LUN to the server running VCenter, create a datastore and present it to the ESXi servers.

C. Present the LUN to all servers and format it with the VMFS file system from any of them, the remaining servers will recognize the newly created datastore.

D. Present the LUN to one of the servers and create a datastore; enable access for the remaining servers.

Answer: C

10.A customer Installed Insight server deployment on a server that also hosts the DHCP server.

Which option is required on the DHCP server for HP Insight Control server deployment to register PXE clients?

A. Option 5 name Server

B. Option 15 Domain Name

C. Option 50 Address Request

D. Option 60 Class ID

Answer: D
