**Exam** : **700-901**

**Title** : Cisco Express Networking

**Version** : DEMO

1.Which accurately captures the Cisco Meraki datacenter design?

- A. Hybrid cloud and on-premises deployment comprised of custom designed servers for real-time replication of data
- B. Regional availability providing data-on demand that replicates customer data and applications across a global infrastructure
- C. Globally distributed, co-located SSAE16 (SAS70 type II) certified datacenters offering 99.99% uptime SLA
- D. Close partnership with hundreds of 3rd party hosting facilities that integrate with existing controls in on-premises environments

**Answer: B**

2.What are two ways that the MX security appliance achieve automatic failover and high availability? (Choose two.)

- A. Survivable Remote Site Telephony
- B. warm spare (using VRRP)
- C. dual redundant uplink support (multiple ISPs)
- D. always on (availability groups)
- E. redundant gateways (using HSRP)

**Answer: BC**

Explanation:
