IT 认证电子书

1 / 3

Exam : **M2180-752**

Title : IBM Smarter Process Sales Mastery v1

Version : DEMO

1.Which statement is NOT true?

A. The Decision Server is based on Eclipse

B. The Decision Server allows to set up rules and events projects, define vocabularies

C. The Decision Server allows to do traditional software unit testing and step-by-step debugging

D. Rules and events projects are deployed only from the Decision Center

E. Decision services are organized from the Decision Server

Answer:D

Explanation:

When the development and testing of rules is complete, you can deploy RuleApps to a runtime environment such as Rule Execution Server. In Decision Center, you create RuleApps for classic rule projects directly in the Enterprise console, or using deployment configurations for decision services in the Business console.

2.Which statement is TRUE?

A. The Enterprise Console is part of the Decision Center and supports the full lifecycle of rule maintenance testing and simulation

B. The Decision Center provides an integrated repository

C. The Business Console, part of the Decision Center, provides a business-user friendly collaborative environment to maintain and update business rules

D. Governance methodology is built into the Decision Center

E. All of the above

Answer:D

Explanation:

3.With IBM ODM, does a policy manager need to involve IT to evaluate the impact of business policy change?

A. Yes

B. No

Answer:A

Explanation:

Enabling business owners to manage their decision logic is an essential benefit of ODM. Also key is the fact that the full spectrum of disparate decisions that emerge from on-the-spot judgments, legacy code, processes, policy briefs, regulations, best practices, corporate documents and personal work aids is centralized in a governed and transparent business-rules repository that ensures visibility into the decisions driving critical business decisions and logic.

4.Business Monitor includes IBM Cognos Business Intelligence.

A. TRUE

B. FALSE

Answer:A

Explanation:

IBM Business Monitor includes IBM Cognos Business Intelligence Server 10.2.1, which provides business intelligence insight through dimensional analysis and reporting.

5.IBM BPM licenses come in 3 options: Advanced, Standard and Express.

Which statement is NOT true?

A. Only IBM BPM advanced is offered as a Pure Application Pattern

B. Only IBM BPM advanced is offered as SaaS on IBM Softlayer

C. Work light Enterprise Edition non production entitlement is available Express, Standard and Advanced

D. Unlimited number of participants is available only with Standard and Advanced options

Answer: D

Explanation:

IBM® Business Process Manager Advanced Pattern provides virtual system patterns that enable the IBM BPM environment to run in a private cloud. You can use IBM BPM Advanced Pattern with IBM PureApplication® System or IBM Workload Deployer.
